

DESIGN IN BALANCE

DK Anni & Bent Knudsen Collection™

Kunsthåndværker- og sølvsmedeparret Anni og Bent Knudsen har siden 1952 designet prisbelønnede kunstklip og mobiler til stor glæde for børn og voksne i hele verden.

Eventyret begyndte i 1952 i Kolding, mens Bent Knudsen endnu arbejdede som sølvsmed hos Hans Hansen. I de sene aftentimer udfordrede Anni og Bent Knudsen hinandens åbenlyse kreative talenter med at designe en ny og moderne type julepynt, kunstklip og mobiler. Op igennem 50'erne blev der således eksperimenteret og produceret kunstklip og mobiler af så eksotiske materialer som papir, fiskeben, halm, peddigrør, tekstiler, skind, træ, glas, o.l.

Virksomheden Anni & Bent Knudsen udviklede sig med raket fart. De høstede stor international anerkendelse for deres gode design og håndværk i høj kvalitet. I 1975 blev der eksporteret til 75 lande over hele kloden. De største eksportmarkeder var USA, Japan, Tyskland og Frankrig.

Den store anerkendelse førte til en række priser og udstillinger af deres arbejder, fx Verdensudstillingen i New York 1964, samt bestillingsopgaver til kongehuset i Danmark og i udlandet. I 1987 blev Anni & Bent Knudsen bl.a. tildelt en designpris, hvor juryens motivation lød: "Hvad H. C. Andersen har været for eventyret, har Bent været for papirklippet!"

Det danske kongehus, heriblandt regentparret, har vist Anni & Bent Knudsens arbejde stor interesse – og har også aflagt besøg hos dem på adressen i Kolding.

Livingly® tager over

Anni Knudsen valgte i 2008 at sælge kunstklip- og mobileaktiviteterne til Livingly® – et dansk firma ejet af parret Kent Sejdelin og arkitekt og designer Louise Helmersen. Vi glæder os over at kunne puste nyt liv i de gamle klassikere, og har nu relanceret ca. 200 mobiler af en total samling på tæt ved 4.000 designs. Og vi finder stadig flere klassikere frem fra gemmerne, ligesom vi selv designer nye produkter.

Håndlavet i Danmark

Alle kunstklip og mobiler bliver produceret i Danmark og samlet af dygtige danske hjemmearbejdere.

Klimakompensation

I Livingly® har vi valgt at klimakompensere vores forbrug af karton og papir, hvilket betyder, at vi via vores leverandør støtter etablering af industriskove for at bevare regnskoven.

Vi ønsker dig en god fornøjelse med vores katalog, og håber, det kan give dig og dine kunder fornyet inspiration til at skabe liv i hjemmet.

De varmeste hilsener
Louise & Kent

UK Anni & Bent Knudsen Collection™

Since 1952 the Danish artists and silver-smiths, Anni and Bent Knudsen have delighted children and adults worldwide with their award-winning paper designs and mobiles. It all began in 1952 in Kolding, Denmark, when Bent Knudsen's craftsmanship was engaged by Silversmiths Hans Hansen. In the evenings after work, Bent and his wife Anni would put their outstanding talents to work designing and producing highly original Christmas ornaments and mobiles, using paper, card board, wood, metal, glass, plastic and other materials – even fish bone.

Anni & Bent Knudsen's concepts quickly became state-of-the-art and by 1975 they were exporting to 75 countries, with major sales in the USA, Japan, Germany and France. Anni & Bent Knudsen exhibited their designs internationally e.g. World Expo in New York 1964, and were commissioned to undertake exclusive assignments by the Danish Royal Family as well as Churches and Community Groups.

In 1987 Anni & Bent Knudsen received a prestigious design award. The distinguished jury's verdict was that Bent Knudsen's contribution to the craft of paper cuts was comparable to the achievements of Hans Christian Andersen, famous for his wonderful and imaginative fairytales. Members of the Royal Family have subsequently paid Anni & Bent Knudsen several visits, showing keen interest in their work.

Livingly® development

In 2008 Anni Knudsen sold the paper cut and mobile business to Livingly®, a Danish company founded by Kent Sejdelin and his architect and designer wife, Louise Helmersen.

Both Kent and Louise feel inspired about the opportunity to re-launching these endearing and classic designs; initially, introducing 200 out of a total collection of approximately 4.000 designs. Future plans will see more of these timeless masterpieces from Anni & Bent Knudsen becoming available as well as a whole new range of contemporary designs – all handmade in Denmark by a skilled workforce.

Ecologically friendly

It is the declared policy of Livingly to work closely with our suppliers to ensure that all our paper and card board materials are sourced from sustainable forests.

Thank you for taking time to read our catalogue. We are confident that the quality and uniqueness of Livingly designs, backed by a proven track record of award-winning success, will add flair to your range and inspire your customers, just as we have been inspired.

Best regards,
Louise & Kent

FR Anni & Bent Knudsen Collection™

Depuis 1952, le couple Danois, Anni et Bent Knudsen, artisans et orfèvre, ravis petits et grands dans le monde entier avec leurs moblies et leurs découpages primés. Tout a commencé à Kolding, en 1952, alors que Bent Knudsen travaillait comme orfèvre chez le grand maître Hans Hansen. Les soirs, Anni et Bent Knudsen, créaient des décorations de Noël et des mobiles. Ils expérimentaient avec le papier, le carton, le bois, le métal, le verre, le plastique et bien d'autres matières – même les arêtes de poisson.

Très vite, les créations d'Anni et Bent Knudsen devinrent très à la pointe et leur marque renommé tenait une grande place dans l'exportation du design danois. En 1975, le couple exportait vers 75 pays. Leurs plus grands marchés à l'époque étaient Les Etats Unis, Le Japon, l'Allemagne et la France. Anni et Bent Knudsen exposaient aussi leurs créations, notamment à l'Exposition Universelle de New York en 1964. La Cour Royale du Danemark ainsi que de nombreuses églises et villes commendaient des créations au couple. La famille Royale a, d'ailleurs, continué à manifester un grand intérêt pour les créations du couple.

En 1987, ils reçoivent un prix pour leur design désigné par un jury qui prononce notamment que les mobiles et découpages de Bent Knudsen ont la même importance pour l'art du papier que l'auteur H.C. Andersen a pour l'art des contes.

Livingly assure la continuation

En 2008, dix ans après le décès de Bent, Anni Knudsen vend la totalité de ces activités à Livingly, une entreprise détenue par le couple Kent Sejdelin et l'architecte et designer, Louise Helmersen.

Chez Livingly, nous sommes heureux et fiers d'avoir relancés ces petits chef d'œuvres. Aujourd'hui, 200 créations sur une totalité de 4000, ont été relançés. Dans les années à venir, nous continuerons à relancer les créations classiques d'Anni et Bent Knudsen tout en développant des nouvelles créations.

Fabriqués à la main au Danemark

Tous nos produits sont fabriqués à la main au Danemark par des personnes formés spécialement.

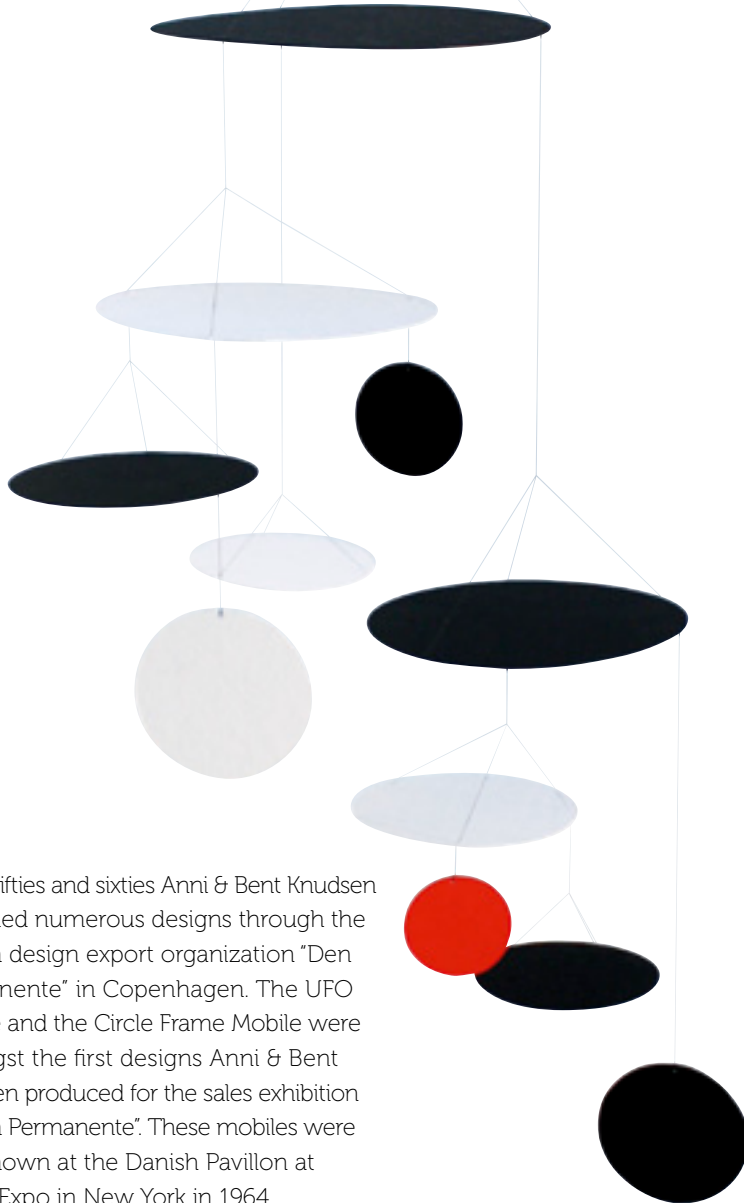

Compensation climatique

Livingly pratique la compensation climatique pour le papier et carton utilisé. A travers nos fournisseurs, nous soutenons le développement des forêts industrielles afin de préserver les forêts naturelles.

Nous espérons que vous aurez du plaisir à regarder notre catalogue, qu'il vous inspire ainsi que vos clients et vous donne envie de faire rentrer plus de vie et de poésie dans vos intérieurs et dans vos maisons.

Bien cordialement,
Louise et Kent

In the fifties and sixties Anni & Bent Knudsen launched numerous designs through the Danish design export organization "Den Permanente" in Copenhagen. The UFO mobile and the Circle Frame Mobile were amongst the first designs Anni & Bent Knudsen produced for the sales exhibition at "Den Permanente". These mobiles were also shown at the Danish Pavillon at World Expo in New York in 1964.

Bent Knudsen's first mobile

Even before Bent Knudsen left school he was fascinated by aesthetics and humourous characters. His first best-seller, "Maren Malkeko" - the cartoonish milking cow with the enormous udder and hanging head, was produced in 1938 when he was only 14 years old.

In 1969 Anni & Bent Knudsen acquired all rights to a series of paper cuttings from the 30-50'ies designed by the author and artist Mrs. Birte Dietz. The designs are characterized by the flat paper emerging into whirling three-dimensional fairytale shapes like the stork, swan, cat and mermaid. The witch is a re-design made by Bent Knudsen based on the original Dietz design.

Twisting Santa
14 cm

Geometrical shapes like circles, triangles and squares were important parts of Bent Knudsen's early designs. Inspired by some of the oldest season's designs by Anni & Bent Knudsen, Louise Helmersen has designed this "Twisting Santa" for 2010.

In 1994 Danish Television made a movie of the creation of the Season's design – and since then it has been broadcasted every year in December.

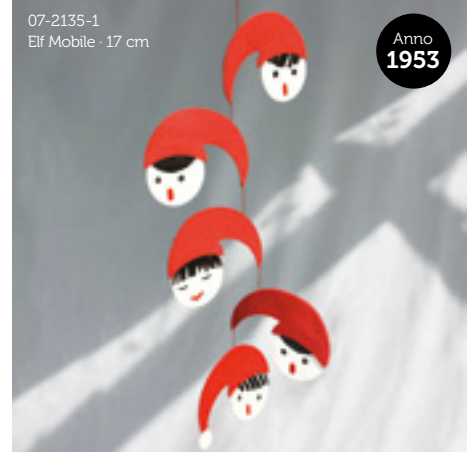

Annual Season's Design

Beginning in 1953 Anni & Bent Knudsen started creating an annual season's design. The theme was a Christmas Elf shaped in numerous ways. You can see the first design to the right.

We continue the tradition by creating a new design every year, and we still produce some of the old designs.

BOXofSTARS™ is a collection of decorative and functional products introduced in 2009 by architect and designer Louise Helmersen.

Each star is made out of two pieces of unique flexible metal foil in the colours gold/silver or silver. They are easy assembled and self-locking due to the construction and the material. Each star comes with a silk band. The large star can also easily be mounted around the top of the Christmas tree.
